

Performance. Long Term.

EP NTZ Micro Filtration's engine and transmission micro filters are a smart addition to your maintenance program. Our micro filters remove particles of 2 microns and larger – faster and more effectively. That keeps your vehicles operating cleaner and longer.

The TransProtector® inline magnetic micro filter improves transmission performance, extends maintenance intervals and reduces overall maintenance costs.

By selecting our ultra-high efficiency bypass micro filters for heavy-duty engines you can extend drain intervals in the short term, and slow engine wear and time to overhaul in the long term.

EP NTZ Micro Filtration. That's the smart choice!

EP NTZ Micro Filtration

The smart choice.
