

Superior protection. Low investment.

Did you know that contamination is the #1 cause of hydraulic system failure?

EP NTZ Micro Filtration's radial micro depth filtration is the smart choice against fluid contamination. Our filters remove the smallest particles, silt and water that can damage your system, with patented technology to provide the best protection for every application:

- Low (85 PSI) to high (3000 PSI) pressure systems
- Easy-to-use portable offline systems
- Installed in bypass or offline
- OE-proven technology in the U.S. and Europe
- ISO certified manufacturing
- Protect your capital investments
- Even filters powdered metal contamination

Pick EP NTZ filters for the best protection possible for your hydraulic systems. It's the smart choice – because what you don't know can hurt you!

EP NTZ Micro Filtration

The smart choice.
